

SKINCEUTICALS MEDICAL FACIAL - Aftercare

Aside from maintaining the results of your skin after this lovely medical facial treatment, there isn't much you need to do.

Day 1:

Your skin may possibly be a little flushed and that should subside relatively quickly post treatment.

- NO sweating, heat sources, extended bouts of UV exposure for 48 hours post treatment or otherwise directed by your Aesthetician
- NO exfoliation (scrub, chemical, loofah or cleansing tool) to be used tonight or for 48 hours post treatment, unless otherwise directed by your Aesthetician

Days 2-5:

Your skin should look and feel fantastic and anytime there is superficial stimulation of the skin, even gently, this can affect what's happening a touch deeper in the skin. Due to this we suggest following the same guideline noted above for a few more days:

- NO exfoliation (scrub, chemical, loofahs or cleansing tool) to be used tonight or for 48 hours post treatment, unless otherwise directed by your Aesthetician

A series of Aesthetic treatments every 4-6 weeks is ideal when working to correct and/or achieve an overall improvement of the skin. We have packages available to ensure your skin is at its' best

If you have any questions or concerns during this time, please reach out and we would be happy to help.
